

JACOBS domain

IRC-IT manages a resource collection called Domain, or Windows Domain, or Active Directory Domain, or Microsoft Windows Domain, or...

The primary goals of a domain are:

- coherent management of IT resources
- providing managed authentication of users and authorization for resource access.

The name of the Jacobs University domain is "JACOBS".

The domain contains several different domain objects, or domain accounts.

Domain accounts are either [JACOBS computer accounts](#) or [JACOBS user accounts](#) (plus others).

In addition, there are [JACOBS security groups](#). A security group is a collection of accounts (and other groups).
