

Summer internships presentations

Many of you have done internships, worked or had some other physics experiences during summer, so let's brag about them and show that physics is broadly applicable and fascinating field to be working in!!!

If you want to give a short/long presentation on your summer internship sign bellow!

- Ugne: internship within computational physics and simulations in sonars producing company
- Aiman: "Flexiformalization of Physics" internship at the Wierstrass Institute with KWARC
