

Deprecation of JACOBS Wi-Fi network for Jacobs members

Dear member of Jacobs Community,

to increase network security and ease of use, we will disable CampusNet login to the JACOBS Wi-Fi on May 24, 2019.

Instead of the JACOBS network, please use eduroam Wi-Fi connections. This is easier to use, more secure, and is available globally.

Please stop using the JACOBS Wi-Fi and configure your devices to use eduroam. Have a look at our [HowTo's for configuring eduroam](#).

Starting in May 2019 we will remind you by email if we detect a Wi-Fi connection from your device using the JACOBS Wi-Fi.

Access for guests to the university will be unaffected and still be possible as before.

Please contact [Service Desk for Faculty and Staff](#) if you need support.

Best regards,
Torge Schmidt

(Head of IT & IRC)
