

More Software

think-cell

[think-cell](#) is a Microsoft Office add-in for PowerPoint and Excel, which integrates seamlessly with these applications to help you visualize complex charts like Marimekko, Gantt and waterfall within minutes. [think-cell](#) also provides a set of tools to structure and maintain agendas within PowerPoint presentations. Free licenses of think-cell are available for Jacobs University Faculty, Staff and Students for use on both University-owned and personal computers. Visit the [think-cell link](#) in the Software Library for more information and to obtain the license key.

For more information, please visit the [think-cell website](#).
