

Salaries for life scientists

I don't know so super much about the salaries for life scientists but according to an [article in the German newspaper F.A.Z. from October 2019](#), the starting salaries for natural scientists in Germany were on average:

- € 46,750 without a PhD, and
- € 51,742 with a PhD.

This applies across all possible fields of work and employment.

Of course, depending on what happens then, the sky is the limit.
