

# Authentication for JACOBS Wi-Fi network disabled for Jacobs members

As announced earlier (see <https://teamwork.jacobs-university.de/x/1QA3Cw>), from today on authentication to the JACOBS Wi-Fi is disabled for JACOBS members.

Instead of the JACOBS network, please use eduroam Wi-Fi connections. This is easier to use, more secure, and is available globally. Have a look at our [HowTo's for configuring eduroam](#).

Access for guests to the university will be unaffected and still be possible as before.

Please contact [Service Desk for Faculty and Staff](#) if you need support.

Best regards,

Stefan Botter

(Network Manager - IT)
